

TWISTER DRYING RACKS

MAX AIRFLOW • NESTABLE • LIGHTWEIGHT

Maximize airflow and make drying a breeze. Unlike tall trays, where product has a tendency to pile on top of each other and thus creating a mold supported environment, our low height trays encourage single layer product drying. And with spaces for 20 trays you get the maximum drying per square foot.

Engineered from clear anodized aluminum, the rack provides strength all while being lightweight for easy transport. Mounted on 4 easy swivel casters allows for omni directional maneuverability. When not in use, the racks can be nested to save space.

DETAILS MATTER.

- Lightweight clear anodized aluminum
- Space for 20 trays
- Dry rack: 26" length x 20" wide x 69" tall
