TWISTER T-ZERO

Cannabis & Hemp Industrial-Grade Trimming Machine

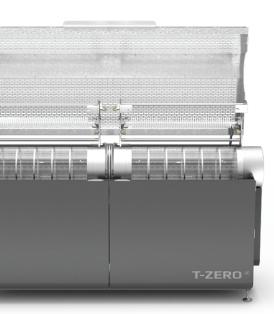

Туре	Feed (lbs/hr)	ed (lbs/hr) Feed (kg/hr)	
Wet	Up to 600	Up to 275	
Dry	Up to 150	Up to 70	

Actual 2019 data gathered by Licensed Provider

T-ZERO SE Features

- Throughput per hour: 600 lbs / 275 kg WET or 150 lbs / 70 kg DRY
- 24hr duty cycle for continuous workflow
- · Carbon Steel Frame for durability
- Stainless Steel tumbler & lid for clean product path
- Variable Speed tumbler & conveyors to match cultivar characteristics
- Data collection and storage with TCloud
- Trim bin to collect trim for additional revenue stream
- Lean workflow using single piece flow
- Simple internet connectivity for remote diagnostic & trouble shooting
- Washdown rated for cleaning

Large Harvest, No Problem

Increase Throughput

Built to run 24-hours a day with a throughput of up to 600 lbs wet and 150 lbs dry per hour. Automate and accelerate production to ensure your product gets to market promptly to maintain flower quality, secure distribution and capture harvest revenue.

Minimum Labour Maximum Return

Decrease Labor Costs

Payback your investment in one harvest. Minimize the time, energy, and cost of your labor force with only five labourers required. The T-Zero SE exponentially increases productivity with single-piece flow while drastically decreasing labor costs.

Minimal Handling To Protect Trichomes

Preserve Cannabinoid Potency

Engineered to replicate the design of scissors, Twister Trimmers generate precision cuts with minimal handling to preserve trichomes and cannabinoids.

Don't let an inconsistent approach reduce the potency and profitability of your flower.
