POTENCY REPORT

# MEASURING POTENCY:

## TWISTER T-ZERO VS HAND TRIMMING

Twister T-Zero Compared to Hand Trimming The main purpose of the lab tests was to assess THC & CBD potency when trimming with the T-ZERO compared to hand trimming. To provide variety, four different cultivars were tested at four different times to provide a better picture. The results are obtained using two independent testing labs, Caro Analytical and MB Labs Ltd.

- The T-ZERO tested between 23.30% - 17.20% THC potency
- There is only a -0.6% - 1.9% change in THC potency when harvesting with the Twister T-ZERO compared to hand trimming

Note, T-ZERO is **192x faster and cost-effective** in personnel than hand trimming.

Lab #1: MB Labs: White Widow (dry flower) // 2020
