

Powerful Non-Stop Performance

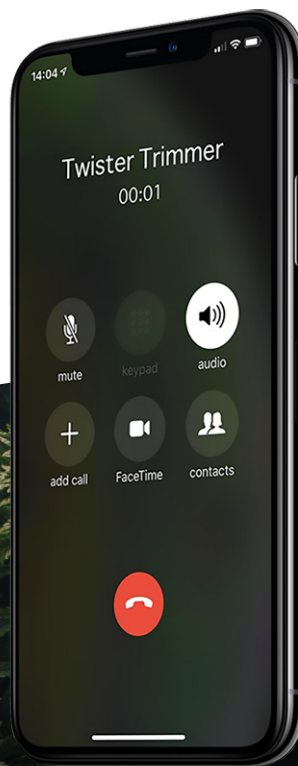

The B4 Bucker is designed to deliver non-stop performance under the most demanding conditions known to commercial cannabis.

An industry first, the B4 Bucker uses an "Active Gearing" system that allows the B4 Bucker to process stems up to 3/4" in diameter at speed rates of 150+ lbs/hr.

- No jams!

Type	Feed (lbs/hr)	Feed (kg/hr)
Wet	Up to 150	Up to 68
Dry	Up to 30	Up to 14

B4

The Buck Doesn't Stop

The Twister B4 is the world's fastest medical cannabis buckler, equipped with the industry's most powerful motor and gearing system. Capable of delivering the safest, most efficient process possible, without the need for down-time and stoppages.

Engineered for single piece flow

Fit the B4 seamlessly into your production line by bucking directly on a conveyor.

- Pull speeds of up to 30 in/sec for large outdoor plants
- Buck at a gentle 10 in/sec for bucking dry plants
- 2 minutes disassembly for quick and easy cleaning
- Pressure-wash friendly

TESTED

Features

- Removable feed cartridges for quick and easy strain changes.
- "Active Gearing" drivetrain to adjust to stem and increase pull force.
- SafeFeed™ adapter on the entry holes to ensure finger safety.
- Second plate included with smaller holes for indoor plants.
- Pressure-washer friendly
- Compression-adjustable, durable neoprene rubber rollers to deliver industry leading pull force.
- Adjustable front shroud allows you to customize the height to match your conveyor or bins.
- Exit shroud prevents access to the rollers from behind the machine: a requirement for safety certification.
- Food safe construction with 304 Stainless and anodized aluminum.
- Pulse speed controls to burst in forward and reverse. Adjust pull speeds faster for larger plants and slower for more delicate dry plants.
