

CURE **PUCK**

PERFECTING THE ART OF THE CURE

The Cure Puck helps ensure perfect curing every time by measuring key indicators in the container headspace, the environment in the curing room and automatically burping containers when required.

Vent gases in a precise and controlled way to maximize the benefits of curing.

Benefits

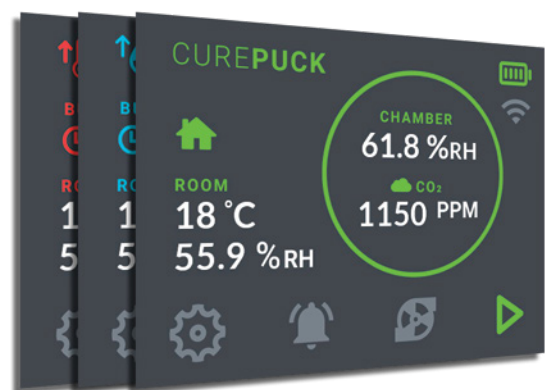

- Stabilize water activity
- Improve flower quality and consistency
- Improve burn, taste, aroma and shelf life
- Preserve terpene profile
- Automate the process
- Peace of mind - ensures your flower is taken care of 24hrs a day
- Remote monitoring and control
- Key insights with data to dial in your curing process

Well cured cannabis is better cannabis

Designed For

- ✓ People who currently cure and want to automate their process.
- ✓ People who do not know how to cure and want to improve their flower quality.
- ✓ Cannabis Nerds who love to know every data point and want to perfect their craft.
